

Supervising Trainees

13 hours of external CPD

Introduction

This blended learning course explores the knowledge, tools and techniques required for the effective supervision of trainees. It consists of several e-learning courses (see below) and a 2.5 hour live webinar. Here, delegates get the opportunity to build on the content delivered by the e-learning modules, using group discussion of relevant case studies and by practising the key skills needed to be successful in their role.

Course structure

- **5 two hour e-learning modules**
- **2.5 hour live webinar**

Webinar objectives

- Build on and consolidate the e-learning courses you have studied around supervising trainees
- Apply e-learning to 'real life' credible scenarios
- Develop problem solving skills

E-learning modules

- Appraisal of Trainee Doctors
- Educational and Clinical Supervision
- Managing the Trainee in Difficulty
- Career Development
- Workplace Based Assessment
