

Educational & Clinical supervisors Refresher T040w

16 external CPD points

Introduction

This half day workshop will help you to build on and consolidate your experience, knowledge and skills from supervising and teaching trainees. Supervisors attending this course should have a basic knowledge in the following areas or complete the optional e-learning prior to attending the workshop.

- Teaching and Training
- Education and Clinical Supervision and Appraising the Trainee
- Trainees in Difficulty
- Workplace Based Assessment
- Career Development

Course structure

- **Half day workshop**
- **3 e-learning modules** - Educational and Clinical Supervision, Trainees in Difficulty and Workplace Based Assessment.

Workshop objectives

- To address the issues and process of exception reporting
- To identify the topics highlighted within the State of Medical Education and Practice in the UK, GMC 2015 and discuss the relevance and management of these issues as an educator
- To learn and apply the Situational Leadership Model To apply the knowledge from your experience to 'real life' credible scenarios and apply feedback models and motivational interviewing techniques, to encourage the trainee to reflect
- To provide the time for you to reflect as a Clinical and Educational Supervisor and plan any development which needs to be included within your scope of practice for revalidation
